# DISASTER AWARENESS TRAINING IN OUR COUNTRY

Is there a need  
for  
'Disaster Awareness Training?'

## Natural events turn into disasters if....

When our country is viewed from a geographical perspective, there is a possibility of many natural events, especially earthquakes, that can turn into disasters if measures are not taken.

If human and technological disasters are added to all these, it is inevitable to take precautions as in the whole world.

# PREPARATIONS BEFORE DISASTERS

For this reason, in order to increase the quality of life of the society, it is aimed not to turn into a disaster by taking precautions with risk reduction activities against events that may turn into possible disasters.

**BE  
INFORMED**

**PLAN**

**PREPARE YOURSELF**

# PREPARING FOR DISASTER

In this context, trainers are trained by AFAD who can provide one-hour disaster awareness training for our citizens as well as foreign citizens living in our country.

# TRAIN THE TRAINERS (DISASTER AWARENESS)

**Purpose of education is to train the personnel who will take a role in bringing the right behaviors before and after disasters to our people and students towards disasters that are common in our country, especially earthquakes, as "Disaster Awareness Instructors".**

# TRAIN THE TRAINERS (DISASTER AWARENESS)

Our target audience are staff of AFAD (primarily), personnel working in Provincial Disaster and Emergency Directorates and other public institutions and organizations. Then last but not least NGOs and Volunteers.

## TRAIN THE TRAINERS (DISASTER AWARENESS)

In order to become an instructor, it is necessary to be at least an associate degree (two-year degree) graduate or to be attending any higher education institution. Candidates who are successful in the evaluation exams at the end of the three-day training are authorized with an instructor (trainer) certificate.

# TRAIN THE TRAINERS (DISASTER AWARENESS)

## Subjects in Education:

- **Basic Knowledge and Concepts**
- **Pre-Disaster Necessary Preparations**
- **Correct Behavior During Disasters**
- **Post-Disaster First Moments**
- **Fire**
- **Evacuation**
- **First aid**
- **Psychological First Aid**
- **Trainer Skills and Presentation Techniques**

# TRAIN THE TRAINERS (DISASTER AWARENESS)

Trainers who successfully complete the training begin (especially where they live) to provide awareness-raising trainings on disasters and emergencies in for the whole of our society within the coordination of AFAD.

The purpose of Disaster Awareness Trainings is to teach individuals the correct behaviors to be done before, during and after disasters that are common in our country, especially earthquakes.

# TRAIN THE TRAINERS (DISASTER AWARENESS)

**Within one hour of training information are given on related subjects;**

- **Basic Knowledge and Concepts**
- **Pre-Disaster Necessary Preparations**
- **Correct Behavior During Disasters**
- **Post-Disaster First Moments**
- **Fire**
- **Evacuation**

# TRAIN THE TRAINERS (DISASTER AWARENESS)

Regardless of the developed country, it is not possible to reach all citizens at the same time after the disaster.

For this reason, family members participating in awareness trainings prepare their own Disaster and Emergency Family Plans with the logic that disasters can happen anytime, anywhere.

## TRAIN THE TRAINERS (DISASTER AWARENESS)

Within the scope of being prepared, they learn to take the necessary preparation before a disaster, to do the right actions during a disaster and then to evacuate their house safely with the Disaster and Emergency Bag that they have to take with them and go to the designated meeting area after a disaster or emergency situation.

# TRAIN THE TRAINERS (DISASTER AWARENESS)

In this way, they learn to live with disasters by taking precautions instead of being afraid of disasters.

# DISASTER AWARENESS TRAINING CENTERS

**Within the scope of awareness trainings, there are Disaster Awareness Training Centers in the province Ankara, İstanbul and Bursa. With using of earthquake simulators built in these centers, awareness training for students at primary school, secondary school and high school level is transformed into behavior.**
