

ECO SECRETARIAT

ECO Statistical Report-2021

Draft

PMS

6/3/2021

The present statistical report has been designed to provide an updated statistical data & information in the tabulated format. The document does not aim at narrowing down individual interpretation of values presented in it, rather it enables broad ECO regional users a fair amount of flexibility in adjusting the perceived data & information for the purposes of the diverse use.

ECO-KSI: ECO Key Statistical Indicators

MHNSO: Meeting of National Statistical Offices

COM: Council of Ministers Meeting

UNECE: United Nations Economic Commission for Europe

UNCTAD: United Nations Conference for Trade and Development

FAO: UN Food and Agriculture Organization

UNESCAP: United Nations Economic Commission for Asia and the Pacific

PoA: Plan of Action

Introduction

The **31st Meeting of the Regional Planning Council (RPC)** of ECO, which was held on 12-21 January 2021, in the ECO Secretariat, Tehran (Iran) instructed that: “the ECO Secretariat work on systematic improvements in regional statistics, to minimize the time lag between the reference period and the publication date of its international statistical publications such as “ECO Statistical Report”, sector-specific statistical reports and statistical bulletins” (paragraph-14, I. Sector: Economic Research and Statistics, Work Programme 2021, available at: www.eco.int (pl. see documents and reports)).

By the thematic focus of statistical data and information, the **24th Meeting of the Council of Ministers Meeting of ECO** adopted the *Antalya Communiqué* which, in paragraph-3 of its Report, pointed out, among others, the need for market information.

QUOTE: “**Prioritize** the need for increasing intra-ECO trade through gradual trade liberalization, implementing existing trade agreement, harmonization of standards, dissemination of market information, enhancing trade facilitation and removal of measures which hamper trade flows and make better use of

The 31st ECO Regional Planning Meeting on 12-21 January 2021 has been participated by 37 senior level representatives of the ECO Member States to discuss the Work Programme and endorse it for the implementation in 2021/22.

instruments at hand on our priority areas of cooperation” (p.3. *Antalya Communiqué*, 24th COM, 8-9 November 2019, Antalya (Turkey)), available at: www.eco.int (ibid).

As with the above tasks set forth for the format of statistical reporting and thematic focus, the present document focuses on the statistical data & information, which provides market-oriented trade exchange information with a particular tilt for trade in agricultural products. From that stance, en-coupe with Trade, Agriculture, as one of drivers of regional economic growth) has its niche firm on soil. Thus, “... exports, manufacturing and agriculture sectors [of national economies] have been major drivers of economic growth in the region through FDI inflows (from US\$3.2 billion to 37.7 billion, 11 times increase) in 2000-2015 (p.2, *Introduction*: paragraph-viii, ECO Economic Review 2017-15 *Years of Economic Cooperation and Development*).

By combining the format of statistical reporting with its sector-specific content, this document promises to strike the right balance between market-oriented trade and the growth-consolidating role of agriculture. Through such balancing intermediation, the present report addresses the data and information needs of the ECO member countries.

Purpose of the Statistical Report

The purpose of the present statistical report is to enable broad regional user easy access to a simple but informative format of delivery of regional data samples so that the users be able to make their own conclusions about a greater population.

Over the past, the **National Statistical Offices** (NSO) of the ECO Member States have adopted the Framework of Cooperation on Statistics, which streamlined ECO regional statistics activities in line with the ten Fundamental Principles of Official Statistics. Among those, the principle guiding the “Source of Official Statistics” prescribes that data for statistical purposes may be drawn from all types of sources, whether they be statistical surveys or administrative records. Therefore, statistical agencies are to choose the source with regard to quality, timeliness, costs and the burden on respondents. In this regard, the information provided by National Statistical Offices through diverse channels of communications with international organizations, including the United Nations, particularly its Statistics Division (UNSD), has been available for the present report via the data sharing

ECO Statistical Subgroups

mechanism established among international organizations and regional partners. The common data access points of other international organizations like the World Bank as well as bodies of the United Nations like FAO, UNESCAP, UNECE, UNCTAD, have been employed for the purposes of the present statistical reporting.

Methodology

In defining the region-specific methodology in statistical analyses and reporting, the NSOs of ECO have formed the **High Level Expert Group on Statistics** in 2008. Till present, the group has held four meetings at the background of relatively recent establishment of international statistics. Among other matters of common interest for the NSOs of ECO, the methodology of ECO regional statistics was discussed against timely updates. The key feature of the ECO regional statistical methodology is that it effectively aligns with common data sharing networks on global statistics with international partners. Every Memorandum of Understanding or other regulatory framework arrangement in ECO does contain a clause in content allowing for official statistics data and information sharing.

ECO Statistical Compendium represents a set of statistical items in 20 major statistical groups which monitors changes in the socio-economic conditions of the ECO Member States within time series. ECO Compendium in user friendly Excel format supported by analytical software, SPSS, thereby enabling easy processing of worksheets for SPSS-treated numeric output data. Further, the output data is treated by balancing items as well as via release of charts and visual reporting items describing trends of periodic changes in indicators by groups, sub-groups and items.

Compendium is being periodically updated based on **ECO Work Programme** and inputs from ECO National Statistical Offices (NSO). Metadata for the ECO-KSIs is aligned with the harmonization norms and provisions set in the ECO regional statistical methodology mandatorily basing on proposals and suggestions of the ECO NSOs.

As per the thematic challenges in the development and implementation of the ECO regional statistical methodology, there exist cross sector groups in the structure of the ECO Secretariat thereby enabling the handling of a timely provision of sector-specific information and inputs.

Owing to the ECO regional statistical methodology, the total **300 ECO Key Statistical Indicators (ECO-KSIs)** have been arranged into the 20 ECO-KSI groups via corresponding statistical tables that have been developed following the detailed and prudent guidance from the NSOs of ECO. The ECO-KSIs are especially effective in tapping in the sector-specific data & information at the sustainable level of technical expertise and practical experience that reside in the NSOs of ECO. In particular, the suggestions and proposals of the NSOs of ECO do contain practical solutions toward new and innovative ways to utilize country resources to improve and speed up the development of international statistical standards, as envisaged by ECO HLEGMs on Statistics. The methodological trimmings under the framework of ECO HLEGMs on Statistics, helps the ECO Member States to ensure that their relevant viewpoints, particularly those concerning the

ECO Plan of Action on Statistics

1. Support for ECO Initiatives, Planning and Policy-making

To ensure the production and improvement of statistics that are needed for the ECO bodies' regional planning and cooperation activities.

1.1. Assist ECO Secretariat in identifying data/indicators that are needed to support the implementation of the ECO initiatives such as the ECO Trade Agreement (ECOTA), ECO Schemes for Trade, Energy and Transportation and Industrial Cooperation, etc. These indicators shall be called the ECO Countries Key Statistical Indicators (ECOKSI).

1.2. Assist in identifying gaps in the provision of (ECOKSI) and develop measures to facilitate the National Statistical Offices/Administrations (NSOs) concerned in the production and provision of missing indicators.

1.3. Establish a mechanism for regular updating of (ECOKSI) by Member Countries;

1.4. Assist in developing and maintaining a selected set of (ECOKSI) on ECO Secretariat Website.

1.5. Assist in the preparation (e.g country wise statistical bulletins, human development indices, millennium development indicators) of statistical indicators/publications of ECO Secretariat that represent the region's characteristics, current issues, and progresses of cooperation activities;

1.6. Establish and maintain linkages with NSO's individual websites; and

1.7. Promote the development of NSO's websites in members where websites are not available.

2. Harmonization of Classification, Concept, Definition, and Measurement

To ensure that international standards of classification, concept, definition, measurement and methodology be adopted or harmonized so that comparable ECOKSI can be produced.

2.1. Review classifications, concepts, definitions, measurements and methodologies of the ECOKSI, currently adopted by member countries against relevant international standards, survey existing international harmonization efforts/programs and develop measures to harmonize them according to the international standards;

2.2. Set up a Working Group on Harmonization of Statistics to coordinate and monitor the harmonization activities, including the above activities.

3. Cooperate on Adoption of International Good Practices

To adopt international good practices those promote transparency and create greater public awareness and appreciation of statistics.

improvement of the ECO regional statistical methodology, are recognized and considered.

In practical sense, there exists the mechanism of interaction among the NSOs of ECO to put into life the recommendations of ECO decision makers. Such mechanism carries some common characteristics, which include:

- i. NSOs are core points for making decisions on matters relating to the development and improvement of the ECO regional statistical methodology.
- ii. Participation by representatives of the NSO of ECO in the meetings of the ECO HLEGM is based on official nominations from the ECO Member States.
- iii. The ECO Member States appoint the designated National Focal Points for ECO Statistics.
- iv. The afore-stated NFPs are mandated to put forward substantive proposals to modify, improve and supplement the ECO regional statistical methodology.
- v. The decisions adopted by the ECO HLEGM are by procedure elevated for approval by Heads of NSOs and further for

3. Cooperate on Adoption of International Good Practices

To adopt international good practices those promote transparency and create greater public awareness and appreciation of statistics.

endorsement at the level of the ECO Regional Planning Council and ECO Council of Ministers.

Key Highlights

The present report is in support of action (1) of the ECO Plan of Action on Statistics.

The ECO Plan of Action (PoA) on Statistics was approved in the **First Meeting of the ECO Heads of National Statistical Offices** held on 28-29 January 2008 in Tehran.

The PoA is guided by principles of practical utility, quality, transparency, and accessibility, in conformance with international standards, while still ensuring confidentiality. Among the most important objectives of regional cooperation in statistics are to:

- 1) Support ECO's regional initiatives, planning and policy-making through the provision of comparable and timely statistics.
- 2) Harmonize classifications, concepts, definitions, and measurements.
- 3) Adopt international good practices; and to promote improvements in the official statistics.

In line with objective (1) of ECO PoA, the present report provides data and information for the informed decision making in the cross-sector areas of Trade and Agriculture given their prime importance as per **ECO Vision 2025**.

Concepts used in the Report

Item

Key concepts

ECO

Economic Cooperation Organization an inter-governmental organization with the land area of nearly 8 million square kilometers and regional population of 440 million people (p.1, ECO Vision 2025, available at www.eco.int).

ECO core economic activity areas

Core activity areas of the ECO are represented by: Trade and Investment, Transport and Communications, Energy, Minerals and Environment, Agriculture and Industry, Tourism and Human Resources and Sustainable Development

Core cooperation areas of the ECO are: A. Trade; B. Transport and Connectivity; C. Energy; D. Tourism; E. Economic Growth and Productivity; F. Social Welfare and Environment. Through the forward-looking dynamics in the core economic activity areas, the ECO "shares the goals and targets defined by the United Nations Sustainable Development Summit in September 2015 as enshrined in its outcome document "Transforming our world: the 2030 Agenda for Sustainable Development". In doing so, we will give priority to the immediate needs and concerns of our Region and its peoples as identified in this Vision. To this end, and will welcome partnerships with the relevant international and regional organizations". (p.2, ECO Vision 2025).

ECO core cooperation areas

Trade is the foremost of the six core economic areas as it has been set forth the task: "to double intra-regional trade increase ECO share in the global trade and specifically exports, increase share in global trade and tap regional trade potential for economic growth" (p.2, Section A: Trade, Strategic objective). From this context, the present statistical report focuses on trade exchange and intra-trade among the ECO member countries.

Trade

Transport and connectivity (one of six core activity area of ECO) is aligned with the strategic objective to maximize connectivity, mobility and accessibility by making major ECO transport corridors

Transport and Connectivity

commercially viable and operational and contribute to achieve goals of information society in the region.

Energy (one of six core economic activity areas of ECO) enhances energy security and sustainability through wider energy access and trade within the ECO Region and beyond.

Energy

Tourism (one of six core economic areas of ECO) establishes a peaceful and green tourism destination with diverse products and high quality

Tourism

services in the ECO region.

Economic growth and productivity (one of six core economic areas of ECO) achieves long term high level growth, knowledge and information based production through increased contribution of research and development (R&D), entrepreneurship, involvement of private sector, increased women participation and SMEs. One of lead drivers of economic growth in ECO is agriculture. This notion stands behind the reasons of the present statistical report's particular focus on trade (exports/imports) in agriculture products in the ECO Region.

Economic Growth and Productivity

Social welfare and environment (one of six core economic areas of ECO) increase the standards of living, quality of life, economic welfare and well being of people through adopting social protection and environment preservation policies in the region.

Social

Welfare and Environment

Land use

Land used for cultivation of crops and animal husbandry. The total of areas under "Cropland"

and "Permanent meadows and pastures. Land use refers to human activities and natural elements on the landscape within a specific time frame based on established scientific and statistical methods of analysis of appropriate source materials.

Irrigated
land

Agricultural irrigated land is the agricultural area, which is purposely provided with water, including land irrigated by controlled flooding.

Arable land is the total of area under temporary crops, temporary meadows and pastures, and land with temporary fallow. Arable land does not include land that is potentially cultivable but is not normally cultivated.

Arable land
Country
area

Area under national sovereignty. It is the sum of land area, inland waters and coastal waters. It excludes the exclusive economic zone

Land area

Country area excluding area under inland waters and coastal waters.

Agricultural land refers to the share of land area that is arable, under permanent crops, and under permanent pastures. Arable land includes land defined by the FAO as land under temporary crops (double-cropped areas are counted once), temporary meadows for mowing or for pasture, land under market or kitchen gardens, and land temporarily fallow. Land abandoned as a result of shifting cultivation is excluded. Land under permanent crops is land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest, such as cocoa, coffee, and rubber. This category includes land under flowering shrubs, fruit trees, nut trees, and vines, but excludes land under trees grown for wood or timber. Permanent pasture is land used for five or more years for forage, including natural and cultivated crops.

Agricultural
land

Surfaces occupied by dwellings on farms, etc.: dwellings, operating buildings (hangars, barns, cellars, silos), buildings for animal production (stables, cowsheds, pig sheds, sheep pens, poultry yards), farmyards. Excludes buildings for agro-food manufacture and buildings in rural areas for exclusive residential purpose.

Rural

Rural population (coverage) refers to people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population. Aggregation of urban and rural population may not add up to total population because of different country coverage.

Rural
population
Rural
population
growth

Annual growth in the quantity of rural population, which is defined as strata of people living in rural areas as defined by national statistical offices. It is calculated as the difference between total population and urban population.

GDP

In the context of the present document, the gross domestic product (GDP), which is the total monetary or market value of all the finished goods and services produced within a country border in a specific time period, in the context of the regional level of the ECO is the aggregate of the GDPs of the ten ECO member countries.

**ECO Key Statistical Indicators of
groups XI and XII
Code: ECO-KSI (TA)
Last updated: 6/2/2021**

Indicator Code	Indicator Name	Source Note	Source Organization
ECO-KSI (TA1)	Agricultural Land	The total area of agricultural land measured in square kilometers	World Bank
ECO-KSI (TA2)	Land Use	Land measured in 1000 hectares that is used for cultivation of crops and animal husbandry.	World Bank
ECO-KSI (TA3)	Ratio to Land Area	Ratio of agricultural land to land area.	World Bank
ECO-KSI (TA4)	Agricultural Land	The percentage of agricultural land to the total country area.	World Bank
ECO-KSI (TA5)	Agricultural Irrigated Land	Agricultural irrigated land is measured as the percent of the total agricultural land.	World Bank
ECO-KSI (TA6)	Rural Population	Rural population measured by number of people in rural areas reflecting the difference between total and urban population.	World Bank
ECO-KSI (TA7)	Rural Population Growth	Annual growth rate measured by percentage change of rural population compared to a preceding period.	World Bank
ECO-KSI (TA8)	Exports of food	Exports of generic quantities of food measured in billion US dollar value and which contain food items classified according to the methodologies practiced in ECO National Statistical Offices.	UNSD
ECO-KSI (TA9)	Exports of agricultural raw materials	Exports of quantities of raw materials measured in million US dollar value and classified in line with the FAO concept of agricultural raw material (notably, as part of an agricultural product or product of agricultural origin, raw or processed, that is marketed for human consumption, excluding water, salt and additives or animal feed.	UNSD
ECO-KSI (TA10)	Agriculture exports	Measured in million US dollar value these represent the export volumes of agricultural products. By agricultural products, the present definition stands for agricultural product/product of agricultural origin means any product or commodity, raw or processed, that	UNSD

		is marketed for human consumption (excluding water, salt and additives) or animal feed.	
ECO-KSI (TA11)	Export of food to ECO	Export volumes measures in US million-dollar value represent trade with ECO at regional and sub-regional levels from countries of Europe, Middle East, Latin America, North American, South East Asia, South Asia, east Asia, Africa and the Pacific as well as from within ECO.	UNSD
ECO-KSI (TA12)	Exports of agricultural raw materials to ECO	The exports of quantities of agricultural raw materials to ECO measured in million US dollar value represent trade with ECO at regional and sub-regional levels from countries of Europe, Middle East, Latin America, North American, South East Asia, South Asia, east Asia, Africa and the Pacific as well as from within ECO.	UNSD
ECO-KSI (TA13)	Exports of agriculture products to ECO	Measured in million US dollar value the export quantities of agricultural products to ECO comply with the definition adopted in FAO of the agricultural product. These are traded with ECO at regional and sub-regional levels from countries of Europe, Middle East, Latin America, North American, South East Asia, South Asia, East Asia, Africa and the Pacific as well as from within ECO.	UNSD
ECO-KSI (TA14)	Imports of food	Measured in million US dollar value, imports of food represent different groups, sub-groups and items of food of which the particular specifications have been indicated in the tabulated information as per SITC revision 3 (0+1+22+4).	UNSD
ECO-KSI (TA15)	Imports of agricultural raw materials Import	Measured in million US dollar value these represent the import volumes of agricultural raw materials that are admitted as part of agricultural product under this report. By agricultural products, the present definition stands for agricultural product/product of agricultural origin means any product or commodity, raw or process. Classifications used for this indicator are in line with SITC 2 less 22, 27, 28.	UNSD
ECO-KSI (TA16)	Import of agricultural products	Measured in billion US dollar value, import volumes of agricultural products are in line with the FAO recognized definition of agricultural product.	UNSD
ECO-KSI (TA17)	Imports of all food items from ECO	Measured in million US dollar value, the import volumes of food items from ECO represent all food items. All food items are defined as any type substance consumed with the aim to provide nutrition for an organism.	UNSD
ECO-KSI (TA18)	Imports of agricultural raw materials from ECO	Measured in million US dollar value, the import volumes of agricultural raw materials are from ECO by countries of world's regions and sub-regions like South-East Asia, East Asia, Middle East, Europe, South Asia, North America, the UK as well as the imports from within ECO.	UNSD
ECO-KSI (TA19)	Afghanistan's exports of agricultural products	The export volumes measured in million US dollar value are from Afghanistan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA20)	Azerbaijan: Exports of agricultural products	The export volumes measured in million US dollar value are from Azerbaijan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA21)	Iran: Exports of agricultural products	The export volumes measured in million US dollar value are from Iran, ECO country, to the rest of the world.	UNSD
ECO-KSI	Kazakhstan: Exports of agricultural products	The export volumes measured in million US dollar value are from Kazakhstan, ECO country, to the rest of the world.	UNSD

(TA22)			
ECO-KSI (TA23)	Kyrgyzstan: Exports of agricultural products	The export volumes measured in million US dollar value are from Kyrgyzstan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA24)	Pakistan: Exports of agricultural products	The export volumes measured in million US dollar value are from Pakistan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA25)	Tajikistan: Exports of agricultural products	The export volumes measured in million US dollar value are from Tajikistan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA26)	Turkey: Exports of agricultural products	The export volumes measured in million US dollar value are from Turkey, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA27)	Turkmenistan: Exports of agricultural products	The export volumes measured in million US dollar value are from Turkmenistan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA28)	Uzbekistan: Exports of agricultural products	The export volumes measured in million US dollar value are from Uzbekistan, ECO country, to the rest of the world.	UNSD
ECO-KSI (TA29)	ECO: Exports of agricultural products	The export volumes measured in million US dollar value are from ECO to the rest of the world.	UNSD
ECO-KSI (TA30)	Afghanistan: Imports of agricultural products	The import volumes measured in million US dollar value are by Afghanistan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA31)	Azerbaijan: Imports of agricultural products	The import volumes measured in million US dollar value are by Azerbaijan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA32)	Iran: Imports of agricultural products	The import volumes measured in million US dollar value are by Iran, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA33)	Kazakhstan: Imports of agricultural products	The import volumes measured in million US dollar value are by Kazakhstan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA34)	Kyrgyzstan: Imports of agricultural products	The import volumes measured in million US dollar value are by Kyrgyzstan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA35)	Pakistan: Imports of agricultural products	The import volumes measured in million US dollar value are by Pakistan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA36)	Tajikistan: Imports of agricultural products	The import volumes measured in million US dollar value are by Tajikistan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA37)	Turkey: Imports of agricultural products	The import volumes measured in million US dollar value are by Turkey, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA38)	Turkmenistan: Imports of agricultural products	The import volumes measured in million US dollar value are by Turkmenistan, ECO country, from the rest of the world.	UNSD

ECO-KSI (TA39)	Uzbekistan: Imports of agricultural products	The import volumes measured in million US dollar value are by Uzbekistan, ECO country, from the rest of the world.	UNSD
ECO-KSI (TA40)	ECO: Imports of agricultural products	The import volumes measured in million US dollar value are by ECO (world's region) from the rest of the world.	UNSD
ECO-KSI (TA41)	Export/Import Ratio	The ratio of exports to imports represented in percent reflects the physical quantities of exports to those of imports in ECO. It describes the ratio of value of exported goods and services to value of imported goods and services of the ECO countries. An increase in export-import ratio means that a country has more export over the value of imports.	UNSD
ECO-KSI (TA42)	Cattle and Buffaloes	Measured in million heads of cattle and buffaloes, these represent calves and young stock under 1 year of age and young stock, 1 year of age and under 2 years. It also represents cattle, 2 years of age and over. The buffaloes are ones under 3 years of age and also buffaloes of 3 years of age and over, as well as the buffalo cows - mainly for milk production.	UNSD
ECO-KSI (TA43)	ECO: Sheep Goat Stock	Measured in million heads of sheep and goats, this group of livestock is represented lambs under 1 year of age, sheep, 1 year of age and over, females - intended for breeding - intended for slaughter. Goats in this sub-group of statistical indicators (total) include the goats under 1 year of age and goats, 1 year of age and over, females.	UNSD
ECO-KSI (TA44)	ECO: Poultry Bird Stock	Measured in millions of poultry and birds are in fact birds raised commercially or domestically for meat, eggs, and feathers. Chickens, ducks, turkeys and geese are birds of primary commercial importance in regional trade.	UNSD

Note: While the World Bank development data indicators used in the present statistical report have been generated by bank thereby constituting secondary data for users, the data indicators referenced from the UNSD are supported by National Statistical Offices.

Concluding remarks

At the background of the target envisaged in the ECO Vision 2025 (ECO's main strategy document) the researches carried out in the framework of the Work Programme 2021 have provided evidence based proof that the ECO region has the potential of eightfold growth in the trade exchange among the member economies. The considerable chunk in such progressive growth is after intra-trade in products. The present report has provided the numeric evidences of the incremental growth in the exports volumes of agricultural products over the past two decades.

The report's combined sector-specific focus through trade and agriculture helped devise important observations based on statistical tables.

Thus, by end 2017, the share of intra-regional trade in commodities registered 7.9% whereas in agricultural products 7.2%. Monetary value of traded agricultural products equaled to US\$30.1 billion at the back of the overall US\$64.2 billion trade (foreign and domestic) surplus for that year. The ECO's export/import ratio flagged 84.6.

Trade facilitation via agricultural products exchange has proven effective. Thus, according to the data reflected in the report and also findings of research projects carried out by the lead regional expert consultants, the increased meat production has contributed to the trade among ECO member countries by relative and absolute measures. Trade in meat and meat products generate approximately US\$ 1.5 billion in business among the ECO countries. The potential growth of the meat sector has been proven by evidences of the increased trade ratio, which rose from 3.7 of total imports in 2018 to 4.4 in 2019. In addition to the rise in trade within the ECO region, the increased production of meat and meat products also reveals its utilized potential for contributing to the international trade, especially considering the favorable geographical access of the ECO countries to economic markets (Europe, China-Korea and Gulf countries) that have a high market-driven demand for meat. As the ECO meat market develops, it will be able to provide products that are currently in high demand in these markets.

At larger regional and inter-regional scales, there is ye a room to grow for the intra-trade in the ECO given the forward-looking projection of the twofold increase by 2025 and the existing eleven times' capacity for intra-ECO trade.

In line with the statistics approach taken by this document, the absence of a bias in presentation of statistical data & information on focus areas in the body of this report enables broad ECO regional reader to make conclusions in line with individual interests and perceptions.

The report else suggests that the subsequent sector specific statistical reporting be dedicated to economic activity areas notably Human Resources and Sustainable Development focusing on intra-trade in pharmaceuticals at the ECO regional level and Tourism to reveal the dynamics of economic recovery processes in the regional tourism industry.

ACKNOWLEDGMENTS

Following the Office Note No. 24 dated 3rd March 2021 within Secretariat, the sectoral Directorates have provided substantive inputs in their respective areas of Trade and Investment; Agriculture and Industry; Transport and Communications; Energy, Minerals and Environment; Tourism, and Human Resources & Sustainable Development. The inputs have effectively contributed to the timely and updated reflection of statistical data and information, designed to provide background work for informed decision making of stakeholders in ECO.
